

New TDT Network Route 380

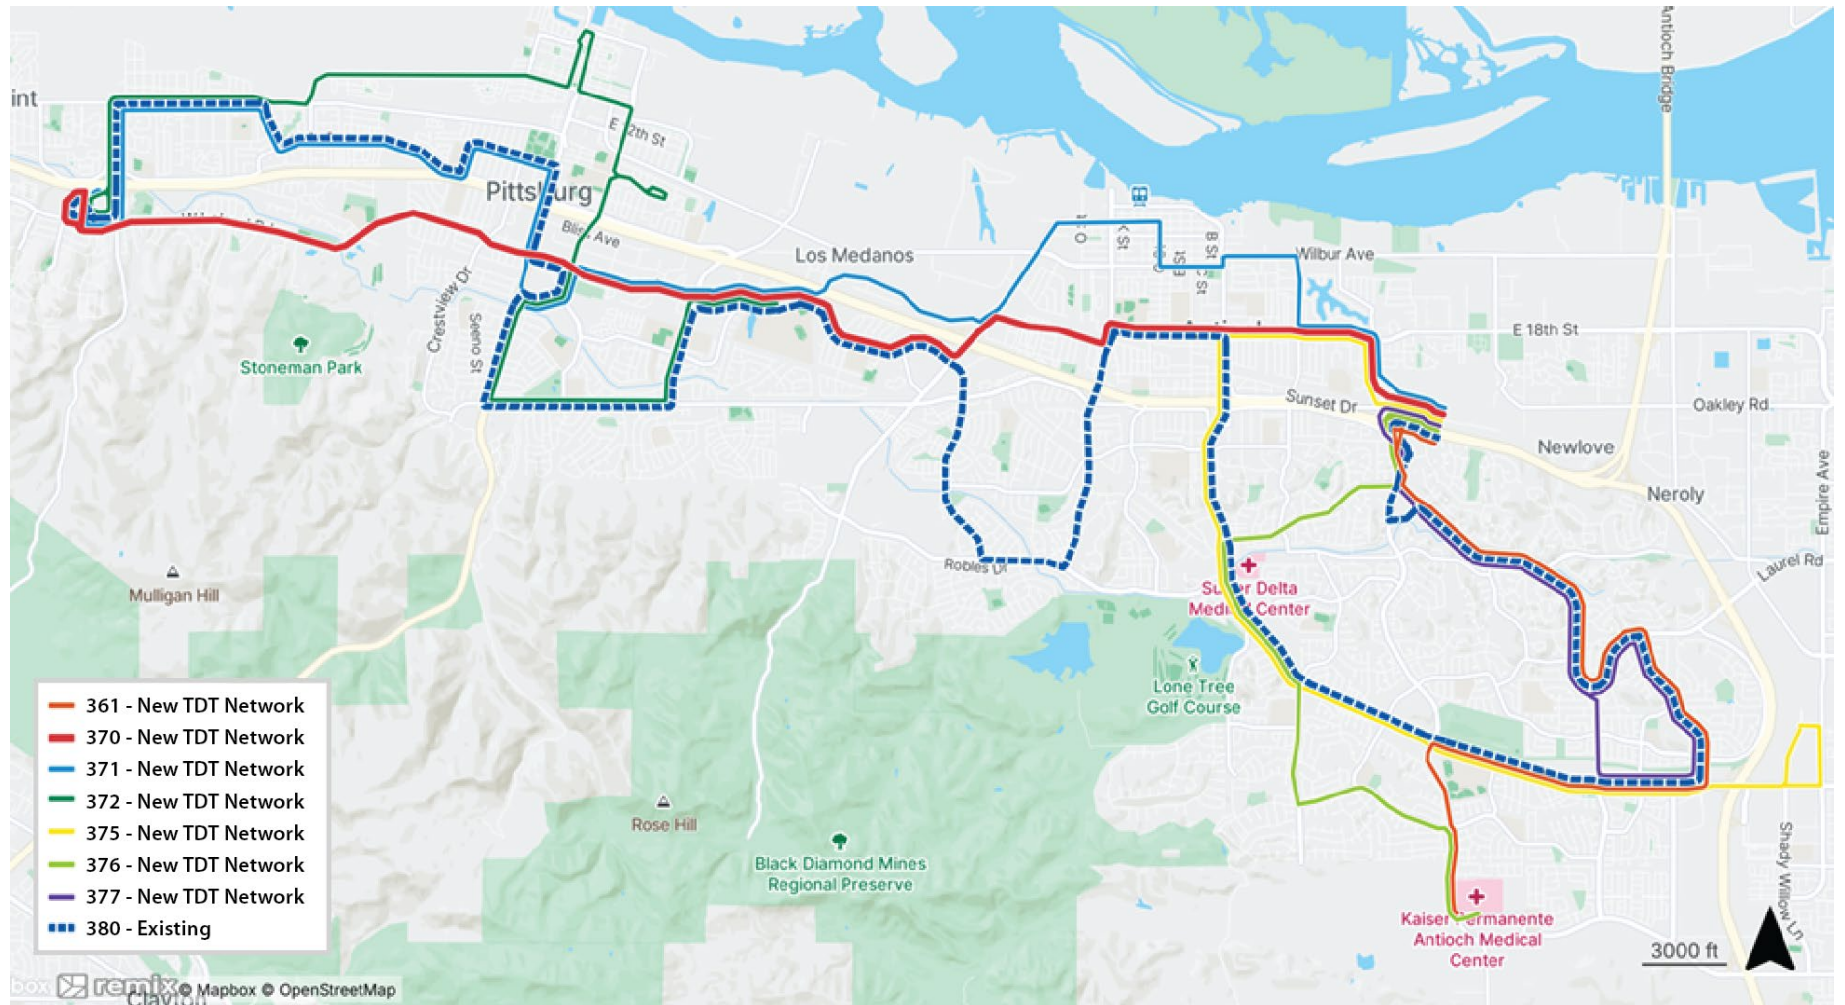

While Route 380 is Tri Delta Transit's highest ridership route, it is circuitous and does not offer a competitive travel time for most riders. In the New TDT Network, **Route 380 is being restructured to improve route directness and frequency** for most riders. All current Route 380 customers will continue to have service, and most will have more frequent service. New service operates as follows:

- Between Pittsburg/Bay Point BART and Pittsburg BART stations, Route 380 is being replaced by a new Route 371, which will operate every 30 minutes throughout the day on weekdays.
- Between downtown Pittsburg and the Somersville Towne Center, a new Route 370 will operate every 15-30 minutes throughout the day on weekdays.
- Between Somersville Towne Center and Antioch High School, Tri MyRide service will be offered, as well as a school-trip timed Route 360.
- Between Antioch High School and Lonetree Way, a new Route 375 will operate every 30 minutes throughout the day on weekdays
- Between Canada Valley Rd and the Antioch BART station, a new Route 377 will operate hourly service throughout the day.

Hours of Service			
	Weekday	Saturday	Sunday
Existing Route 380	3:51am-9:43pm	7:46am-10:46pm	7:46am-10:46pm
